Dear Hiring Manager,

I am Shresth Rohan, a second-year Computer Science and Data Science student at Vellore Institute of Technology (CGPA: 8.69), writing to express my strong interest in a Software Engineering / Data Science internship at your organisation. With hands-on experience building full-stack AI-powered systems and data analytics platforms, I am eager to contribute to challenging, real-world projects while continuing to grow as an engineer.

My project portfolio demonstrates an ability to take ideas from prototype to production. Key highlights include:

- **FocusGuard** — an end-to-end AI attention-monitoring system using MobileNetV2 transfer learning (PyTorch, ONNX) that classifies focus states in real time via webcam, served through a Flask REST API and a React dashboard with session analytics and confidence visualisation.
- **TradeScope** — a full-stack stock portfolio management platform (Java Spring Boot, PostgreSQL, Python) featuring a normalised SQL schema with indexed queries that reduced analytics retrieval time by 60%, alongside a Python engine computing Sharpe ratio, rolling volatility, and benchmark-relative returns.
- Achieved **State Rank 3** in the SilverZone International Informatics Olympiad and **Zonal Rank 1 (Bihar)** in the SOF International English Olympiad, reflecting strong analytical and problem-solving foundations.

I am particularly drawn to your company because of its focus on engineering excellence and its commitment to building products that make a real difference. My background in Python, Java, React, and machine learning — combined with a genuine passion for UI/UX design and competitive programming — positions me to contribute meaningfully to your team from day one.

I would welcome the opportunity to discuss how my skills and projects align with your team's goals. You can reach me at **shresthrohan10183@gmail.com** or **+91 7479853320**. Thank you sincerely for taking the time to consider my application — I look forward to hearing from you.

Yours sincerely,
SHRESTH ROHAN
